

# iOS14 Local Network Setting Guideline

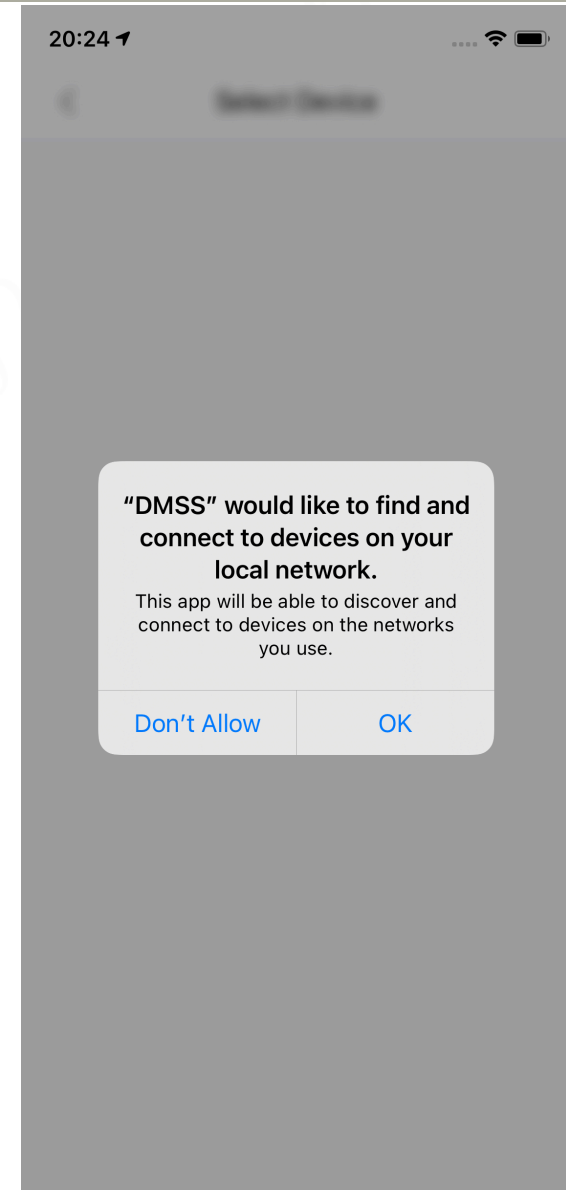

Mr Yang

2020/9/15

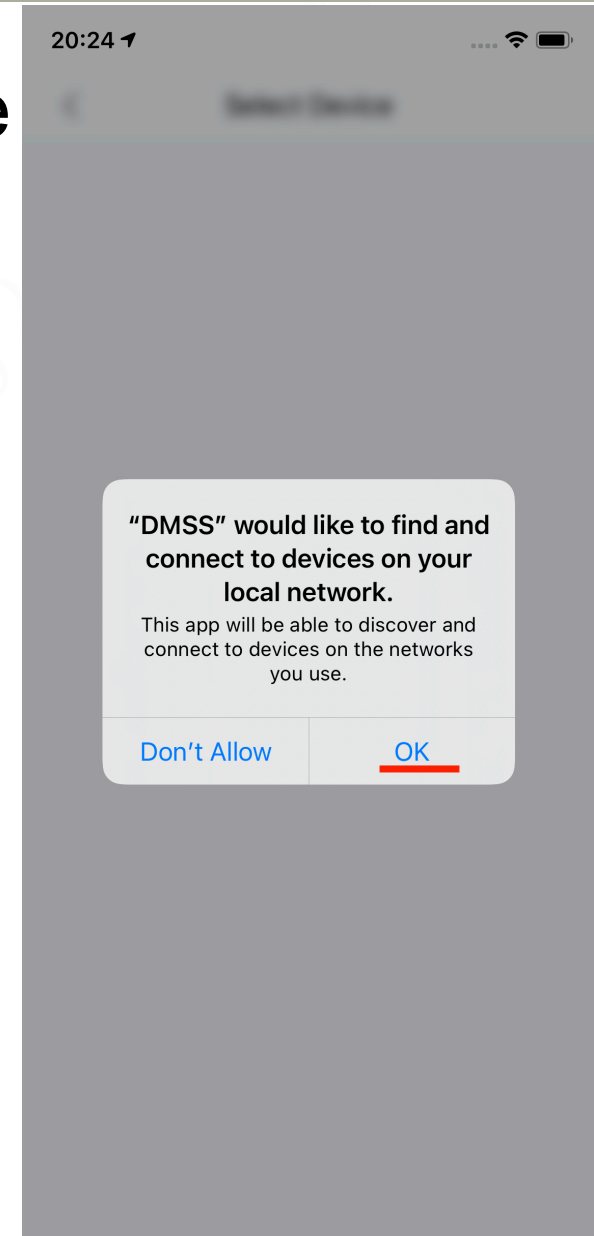

# What's it?

1、 If you update your iphone to iOS14, open App,you will see a system popup.

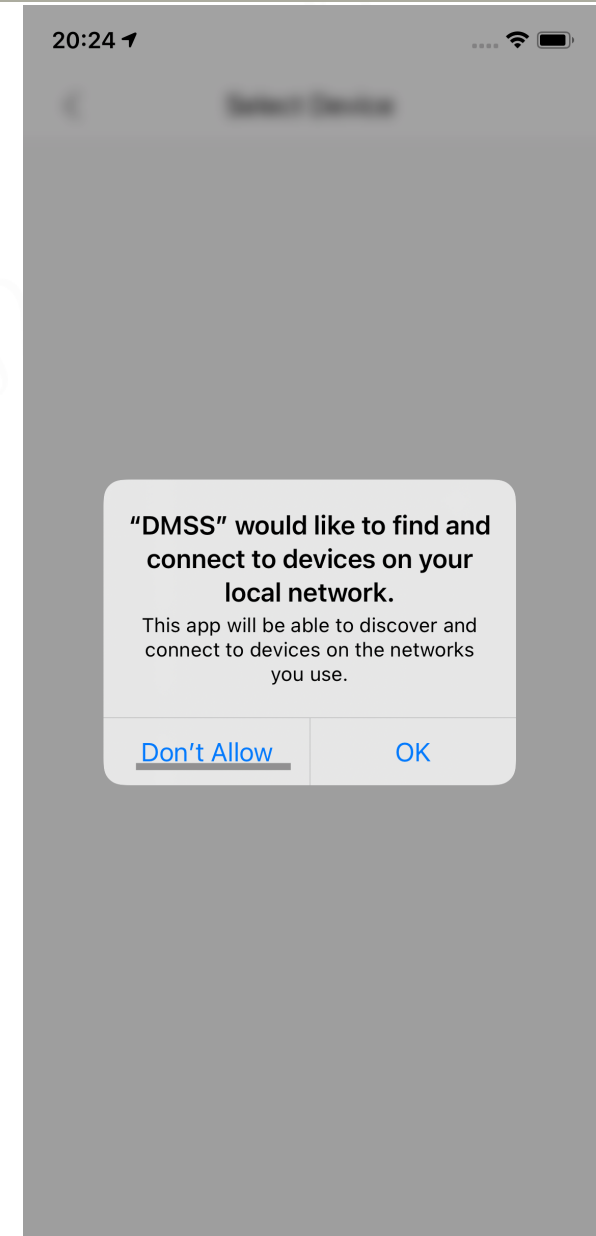

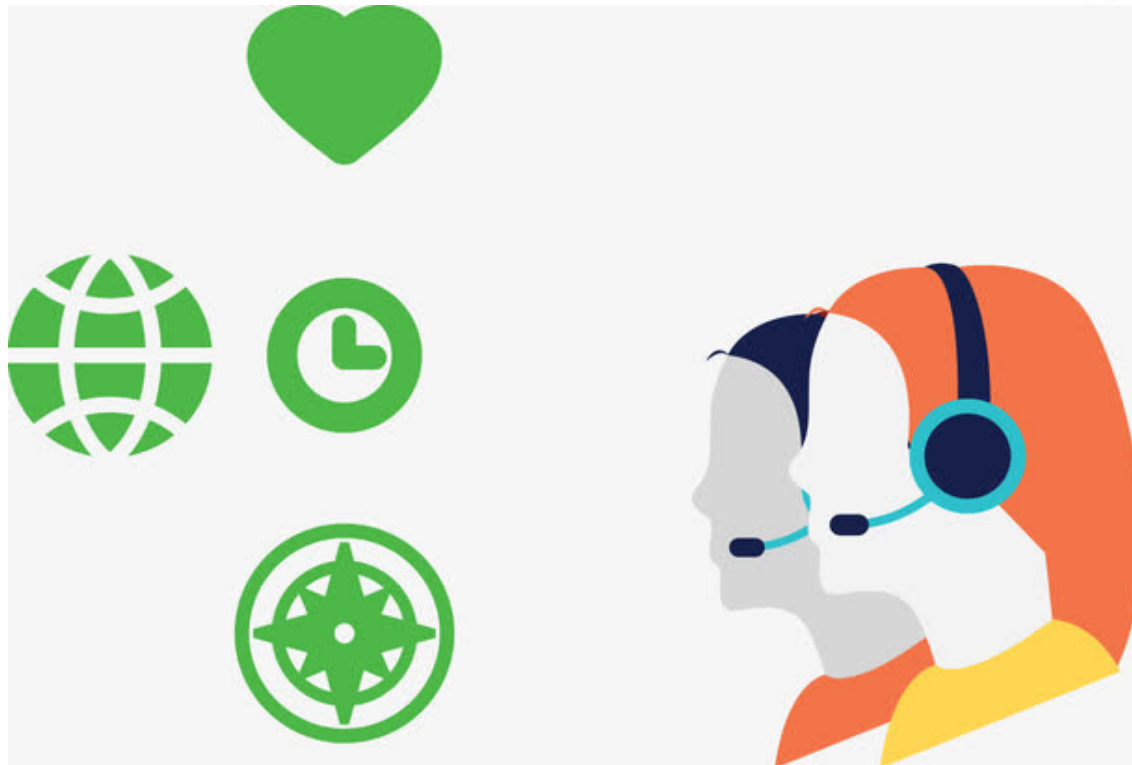

# Choose OK

2、 Please select “OK”. Because many of our functions will use this permission of the system, such as LAN search, Wi-Fi configuration, LAN streaming, etc.

# Don't worry

3、 If you choose “Don't Allow”, then you are not able to use wifi-related functions normally, but don't worry.

# How to resolve it

4、 Go to system settings about the App, you will see the “Local Network” button is off, just open it.

# It works

5、 Make sure the "Local Network" Button is opened.To test the App's WiFi-related functions, they will work normally.
