WizMind

Launched by Dahua Technology, Dahua WizMind is a full portfolio of solutions composed of project-oriented products including IPC, NVR, PTZ, XVR, Thermal and software platform which adopts industry-leading deep learning algorithms. Focusing on customer's requirements, WizMind provides precise, reliable and comprehensive AI solutions for verticals.

System Overview

Mini Hubble Panoramic Network Camera brings together the power of the bullet camera and PTZ camera into one powerful design. This all-in-one camera harnesses the expanse of its panoramic view to track targets and detect details in the monitored scene. The bullet camera combines 8 sensors that work in tandem to realize 360° panoramic surveillance. It has a large aperture lens that leverages flowing light technology to detect targets even in poor lighting, and supports image correction and editing video recordings on the platform. The PTZ camera cooperates with the bullet camera to perform smart tracking and quickly detect details in the monitored scene. Advanced algorithms are integrated into the functions of the Bullet camera and PTZ camera, allowing them to perform detection and trigger a variety of alarms such as tripwire, intrusion, face detection and video metadata. The PTZ camera can also be set to automatically or manually track targets, allowing the all-in-one camera to meet the security needs of complex scenes.

Face Detection

Dahua Face Detection technology can detect the face in the image. With deep learning algorithm, the technology supports detecting, tracking, capturing and selecting the best face image, and then outputs face snapshot.

Video Metadata

With deep learning algorithm, Dahua Video Metadata technology can detect, track, capture vehicle, non-motor vehicle and people, and select the best images, and extract attributes.

Cyber Security

Dahua network cameras employ a series of security technologies, including security authentication and authorization, access control protocols, trusted protection, encrypted transmission and encrypted storage. These technologies improve the camera's defense against external cyber threats and prevent malicious programs from compromising the device.

AR Panorama

Dahua AR panorama technology generates wide-field of view through panoramic merging and splicing. The software overlaps the cameras as tags in the image. Click the tag to display the corresponding camera video, which makes monitoring visual and convenient, and improves command efficiency.
