

Tattile Stark Plugin - Tattile Stark Plugin allows to connect Milestone XProtect to all Tattile ANPR cameras with Stark

Tattile Stark Plugin allows the integration between XProtect and all Tattile ANPR cameras with Stark. The plugin enables different features. For example, it is possible to receive and collect all the events received from the Tattile Stark cameras connected with Milestone XProtect; it is possible to receive and see the video streaming and filter the results for an easy and fast evidence search.

The integration can be used for different applications like tolling, speed enforcement, red light enforcement, traffic tracking, access control, and tunnel safety.

Key features

- Embedded Technology: OCR and image processing is embedded in the ANPR Camera (no need for extra PCs or software licenses)
 - Neural Accelerator
 - Multi transit/second management capability Embedded brand and color recognition Embedded optical vehicles classification
 - Two on-board Licence plate recognition SW
 - Object and transit detector
